Work Progress
kNN Search with Parallel Incremental Query Answering

Jaouhara Chanchaf

Tuesday Dec. 12th, 2022

1. Summary

Done:

AI 1 (Part 1)	PEXESO fix long query time.

In progress:

AI 1 (Part 2)	Compare Kashif and PEXESO querytime.

Not started: AI 3 - AI 9

3. Discussion

- ▶ PEXESO prefromance degrades when filtering lemmas are not used.
- ▶ Pivot selection algorithm does not find good pivot vector and a large number of vector end up out of the pivot space.
- ▶ Unkown query column size in paper experiments.
- ▶ Ibsina server, session gets killed unexpectedly.
